

DRAFT TPC Group Fire

Water

EPA conducted surface water sampling on December 11, 2019 and collected 7 water samples at 6 sample locations. The surface water samples were collected along the Neches River and in canals to the southeast of the site and will be analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total organic carbon (TOC), glycols, total petroleum hydrocarbons (TPH) and oil & grease. The results from the sampling event will be compared to the TCEQ Surface Water Quality Standards (TSWQS), or to TCEQ Texas Risk Reduction Program surface water protective concentration levels (PCLs), if a WQS is not available for a chemical.

Internal work product – this is a draft document and will be finalized once the validated data is received
